Dear Property Owner:

TVA is planning a power system improvement project in Davidson, Williamson and Wilson Counties, Tennessee. Tax records indicate that this project may affect property that you own.

TVA plans to uprate the existing Davidson-Pin Hook-Wilson 500-kV Transmission Line starting at the Davidson 500-kV Substation and going to the Pin Hook 500-kV Substation and ending at the Wilson 500-kV Substation. This work is scheduled to be complete by fall 2008.

The uprate will consist of placing extensions in nine towers along the line to increase their height. In addition, the conductor on the towers will be re-tensioned. This will require equipment access along the right-of-way; minor right-of-way clearing; and linemen climbing towers, cutting pieces out of the conductor, and replacing the conductor on the tower.

TVA may need temporary access across a portion of your property to access right-of-way for this work. We will be contacting you to discuss this access.

If you have any questions regarding this matter, please call Missy Jaynes Davis, Siting Engineer, toll-free at 800-362-4355; write to her at 1101 Market Street (MR 4G), Chattanooga, Tennessee 37402-2801; send an email to newtransline@tva.com; or send a fax to 423-751-4098.

Sincerely,

A handwritten signature in black ink that reads "W. David Hall". The signature is written in a cursive style and extends to the right with a long horizontal line.

W. David Hall, P.E.
